

REHYDRATE THE BIRDS

With

FEDMINT™

Liquid Betaine with Mint and electrolyte- *ideal antistressor*

## Cost of stress in Birds:

### BROILERS

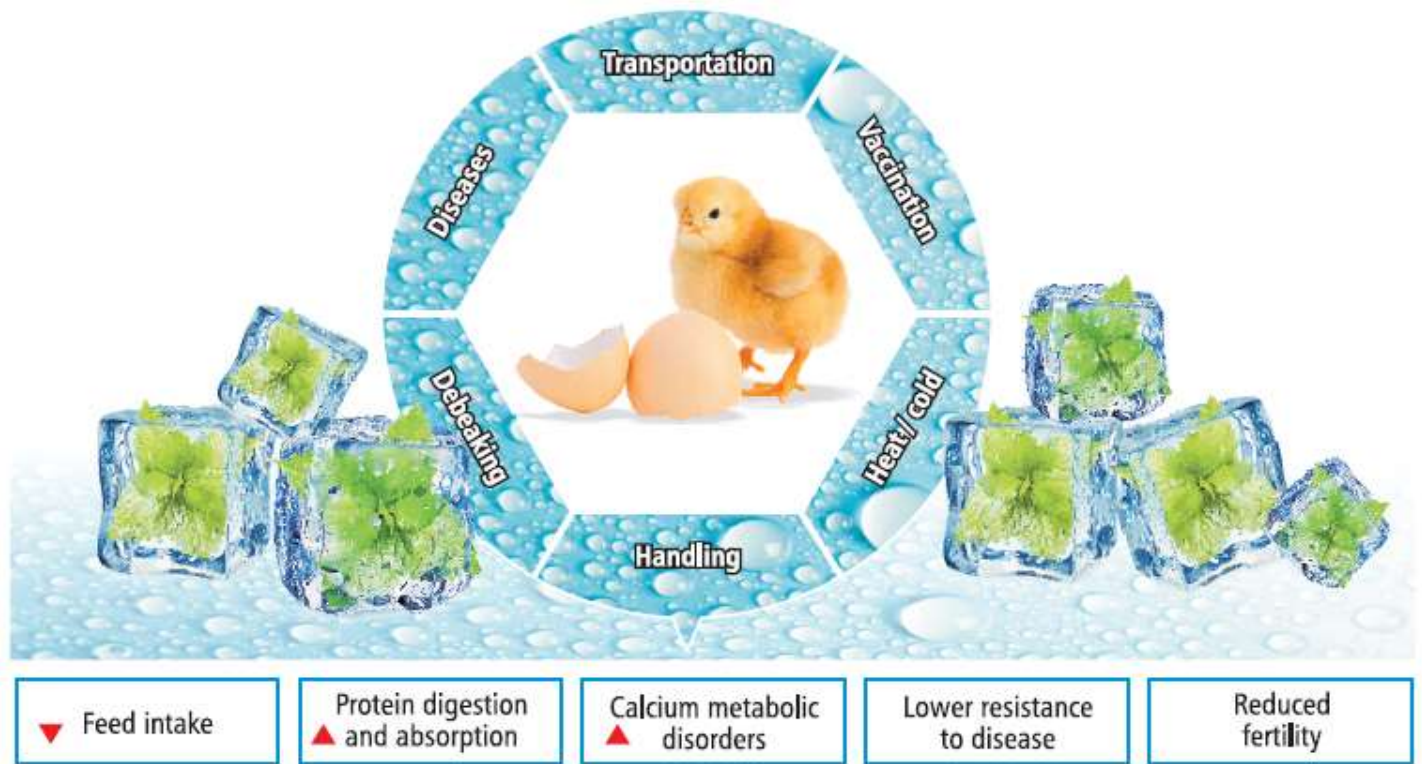

High FCR, Low weight gain, High mortality, High percentage of carcass condemnation

### LAYER

Low laying percentage, High mortality, poor egg quality

### BREEDER

Poor hatchability %, Low fertility, poor semen quality

# FEDMINT™

An Ideal Stress Reliever for your birds

#### ◀ Rehydrates the animals and reduces wet droppings

Betaine acts as an osmolyte and helps to retain water. Electrolytes restore hydro-electrolytic balance and acid-base equilibrium.

#### ◀ Prevents fatty liver and enhances metabolism

Betaine is a methyl group donor

#### ◀ Reduces stress

Vitamin C reduces circulating corticosterone concentration

#### ◀ Gives sensation of freshness

Menthol stimulates the oral mucosa sensory cold receptors.

#### ◀ Ensures treatment

Menthol and sweeteners increase palatability and attraction. Liquid form allows easy solubility in water

### Composition

Each liter contains

Betaine ..... 25%

Vitamin C ..... 9%

Potassium chloride

Magnesium chloride hexahydrated,

Calcium chloride dehydrated,

Sodium chloride and sweetening

mentholated excipients ..... q.s.

### Key benefits

- Aids to correct dehydration
- Reduces stress by symptomatic relief
- Improves farm economy & reduces shrinkage percentage white use at pre-liquidation stage

### Usage Indication

Relief of stress syndrome & heat stress symptoms

### Usage Instruction

1 ml per liter of drinking water for 3-5 days before beginning of stress period. 2ml per liter of drinking water during stress period for 3-5 days and can be continued if stress persists.

### Presentation

1 liter
