

FINZINK

Potentiates-
Immune, digestive & reproductive system

Innovative liquid zinc for multiple health & performance benefits

- ◇ FINZINK improves health, vigour and performance of the animals
- ◇ Improves digestive health and gut immunity—thereby reduces the incidences of diarrhoea in large animals and poultry
- ◇ FINZINK improves general immunity and reduces the susceptibility
- ◇ In poultry— improves egg shell quality and reduces breakage percentage. FINZINK improves hatchability in breeding stock

INDICATION:

- **In large animals** - for improving appetite, fertility, immunity and as supportive in diarrhoea cases, during mastitis treatment
- **In poultry, duck** - to improve immunity , supportive to diarrhoea, in laying birds to improve egg shell quality and hatchability (in breeding stock)
